

Implementation And Healthcare Improvement Masterclass

Managing change for direct health impact | 10 & 11 October 2019 | Monash Medical Centre, Clayton

Join us for a two-day course that will 'unpack' how implementation science combines scientific disciplines to help explain approaches that enable people to adopt change in complex health systems. Hear from internationally renowned experts on innovative means to improve the healthcare system

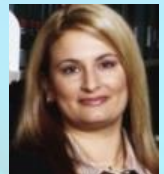

- **Aimed at health professionals, researchers, policy makers and front-line clinicians who seek guidance and inspiration on healthcare improvement.**
- **Much has been written about the quality chasm in healthcare – the gap between our knowledge and our practice. We will review common conceptual frameworks and explore core implementation components.**
- **Demonstrate how implementation science can be combined with healthcare improvement to improve outcomes for service users and the community.**
- **Facilitated by experts in the field who will guide participants seeking to initiate their own implementation projects and support those currently involved in healthcare improvement projects**

Prof. Danny Liew

Prof. Helena Teede

Prof. Helen Skouteris
